(54) Title: RFID SEAL TAG

(57) Abstract: An RFID tag (400) adapted for use as a tamper-evident seal. The tag includes an RFID transponder having an integrated circuit chip (402) and an antenna (404) connected to the integrated circuit chip. When intact, the RFID transponder is able to communicate with an RFID interrogator device. The tag further includes a line of weakness (412, 414, 416, 418), such as a line of perforations, extending across at least a portion of the antenna or between the antenna and the integrated circuit chip. When the tag is broken along the line of weakness the RFID transponder is rendered unable to communicate with the RFID interrogator device.
